## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1,7,16, and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Pepper(US 6,661,297).

The reference by Pepper shows a vco circuit with plural oscillators(12) that oscillate in respective frequency bands, with tuning control(Vtune), see figure 1; selector circuits (30) allow for the selection of a particular oscillator output to be sent to a respective limiter(14) that limits the output of the oscillator.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2817

3. Claims 1,7,16,17 rejected under 35 U.S.C. 102(b) as being anticipated by Pepper(US 2002/0075086).

The reference by Pepper shows a vco circuit with plural oscillators(12) that oscillate in respective frequency bands, with tuning control(Vtune), see figure 1; selector circuits (30) allow for the selection of a particular oscillator output to be sent to a respective limiter(14) that limits the output of the oscillator.

***Allowable Subject Matter***

4. Claims 2-6, 8-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The examiner could not find fair suggestion for the differential amp operating in saturation state...

5. Claim 15 and 18 are allowed.
